

STANDARD OPERATING POLICIES AND PROCEDURES

	Environmental Policy	OP-Ad-310
---	-----------------------------	-----------

POLICY:

Option Care Health, Inc., together with its subsidiaries (collectively, "Option Care Health"), recognizes that environmental issues are vitally important, and that our actions today have inherent risks and will have an impact in the future. Option Care Health is committed to minimizing our use of resources and optimizing our operations to protect our environmental resources against the physical and human health risks of climate change. The purpose of this Environmental Policy is to set forth our commitments to environmental responsibilities. In addition to Option Care Health's commitments, all suppliers and vendors are expected to comply with applicable laws regarding environmental practices, maintain all required environmental permits and follow their reporting requirements.

Environmental Commitments:

- Complying with all federal, state, and local environmental laws and regulations applicable to operations and facilities
- Developing programs and processes to ensure compliance with identified environmental regulatory requirements and to minimize our impact on the environment and natural resources
- Periodically and systematically reviewing environmental risk and priorities set to ensure regulatory obligations are being met or exceeded
- Be prepared to adapt to any changes brought about by climate change
- Manage responsibly the resources used by Option Care Health in its day-to-day operations
- Use energy responsibly throughout our business, including conserving energy, and improving energy efficiency
- Educate our team members about the steps we are taking to help protect the environment
